

# TOWNSHIP OF FRANKLIN

ENGINEERING  
DEPARTMENT

DETAILS &  
SPECIFICATIONS

Revised: ~~January 9, 2004~~  
~~May 25, 2005~~  
~~January 12, 201~~  
October 28, 2014

## **TABLE OF CONTENTS**

1.	Standard Notes	1 & 2
2.	Cold Weather Restrictions	3 & 4
3.	As-Built, Commercial	5
4.	As-Built, Residential	6
5.	Curb Details	7, 8, 9, 10
6.	Handicap Ramp Details	11 & 12
7.	Sidewalk	13
8.	Roadway Section	14
9.	Street Opening Restoration	15
10.	Utility Pipe Bedding Details	16
11.	Storm Manhole	17 & 18
12	Inlet	19 thru 23
13.	Headwall	24 & 25
14	Concrete Pipe Cradles	26
15.	Under Drain	27
16.	Street Name Sign Detail	28
17.	Sign Posts	29
18.	Landscape, Plantings	30
19.	Preservation Area Markers	31

20.	Light Pole	32
21.	Lighting Diagram	33 & 34
22.	Hydrant Assembly	35
23.	P.I.V. Schematic	36
24.	Water Line – Restraining Length Schedule	37 & 38
25.	Water Line – House Service Connection	39
26.	Fire Department Connections	40
27.	Fire Department Fire Lanes	41
28.	Fire Lane Bollards & Chain	42
29.	Fire Department Access Gates	43
30.	Water Specifications: Piping, Fittings & Appurtenances	44
31.	Clay Core – Detention Basin	45

**SANITARY SEWER DETAILS MAY BE OBTAINED FROM  
THE FRANKLIN TOWNSHIP SEWERAGE AUTHORITY  
(732-873-2121).**

# **FRANKLIN TOWNSHIP ENGINEERING DEPARTMENT**

## **STANDARD NOTES APPLICABLE TO ALL PROJECTS**

***ALL MATERIALS, WORKMANSHIP AND CONSTRUCTION  
FOR SITE IMPROVEMENTS SHOWN HEREON SHALL BE IN  
ACCORDANCE WITH THE FOLLOWING, AS APPLICABLE:***

- A. New Jersey Department of Transportation "STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION".
- B. Current prevailing Municipal and/or County Specifications, Standards and Requirements.
- C. Current prevailing Utility Company/Authority Specifications, Standards and Requirements.
- D. State of New Jersey B.O.C.A. Code and Barrier-Free Design Regulations as Currently Amended.
- E. Current ANSI/AWWA Standards, Specifications and Requirements for the Water Supply System material.
- F. Water line testing to be performed to Utility Company standard of 200 p.s.i. for two hours without any leakage or pressure drop.

As-Built plans of the entire site prepared by a New Jersey Licensed Land Surveyor, in accordance with Township requirements, are to be provided to the Township prior to the release of the performance bond.

No soil may be imported to or removed from the site until a soil importation or exportation permit is obtained from the Engineering Department.

The subgrade of all streets and parking areas must be proof-rolled using a tri-axle tandem dump truck with a minimum certified weight of 70,000 lbs. fully loaded. The proof-roll is to be conducted under the direct supervision of the Township Engineer or his representative.

### **Construction Castings:**

Note that all castings shall be of United States manufacture and NJDOT approved. If other than Campbell, Neenah, Bridgestate, Emporia, Quirin or East Jordan Ironworks castings are planned to be used, complete data must be submitted including, but not necessarily limited to, an affidavit certifying that the castings were made in the U.S.; load capacity based on the standard highway loading; weights and configurations of the castings and metallurgical analysis. All grates are to be "bicycle safe". Curb pieces for Type "B" inlets are to be Type "N-Eco" for all new and replacement structures.

## **210-45. TRENCHES**

All trenches or ditches which cross an existing street or which are dug for sewers, water mains, gas mains or other utilities, including the house connections for these utilities, shall be filled with Quarry Process Stone. The stone shall be placed in layers not exceeding twelve (12) inches in depth and shall be sprinkled with water and mechanically compacted. All soft spots and depressions in a surface, which has been graded, will be removed and filled with stone of a size to be determined by the Township Engineer. All trenches which are dug in a future street or existing R.O.W., on which no subbase or pavement has been constructed shall be backfilled as indicated above or maybe backfilled with suitable on-site excavated materials or imported fill.

Prior to using any on-site and/or imported soil materials the contractor or any individual or firm shall employ a recognized soils laboratory to secure soil samples; perform the necessary laboratory analysis and establish the compaction and other criteria necessary for the proper placement of the backfill. A report of the laboratory findings, including the compaction specifications, shall be submitted to the Township Engineer for review and approval prior to commencing any backfill operations using on-site and/or imported soil materials.

During the backfilling operations, the contractor or any individual or firm engaged in backfilling operations shall employ a Professional Engineer, Licensed in the State of New Jersey, or his representative, who is regularly engaged in the practice of geotechnical engineering and who is trained in soil mechanics, to observe the placement of the backfill. The soils engineer shall file daily reports, with the Township Engineer indicating the results of the compaction and upon the conclusion of the project file a final certification indicating that the backfill material has been placed and compacted in accordance with the recommendations contained in the approved laboratory report.

**Backfill in trenches in field or lawn areas shall comply with the requirements for on-site or imported soil materials, as indicated above.**

## **PIPING**

**All storm sewer, sanitary sewer, and water main piping shall maintain a minimum of ten (10) feet from building foundations or other structures**

## **DRIVEWAYS**

**Driveway connections to street right-of-ways shall maintain a perpendicular alignment and comply with Article XI - Off Street Parking and Loading**

# COLD WEATHER PAVING RESTRICTIONS

DURING THE COLD WEATHER MONTHS FRANKLIN TOWNSHIP ENGINEERING WILL ENFORCE THE FOLLOWING REGULATIONS TAKEN FROM N.J. STATE STANDARDS.

- 1.) The surface upon which the bituminous concrete is to be placed shall be clean of all foreign and loose material, dry and free from ice when the paving operations are about to start and shall be maintained in that condition.
- 2.) Bituminous concrete mixtures shall be placed when the combinations of laydown and base surface temperatures are within the limits shown in the table below, when the weather is not rainy, and when the roadbed is in satisfactory condition.
- 3.) Temperature testing equipment shall be supplied by the contractor. Laydown temperature will be measured in the receiving hopper of the paver.

**Minimum Laydown Temperature (Degrees F)**  
**Pavement Thickness (Inches)**

Base Temp	$\frac{1}{2}$	$\frac{3}{4}$	1	$1\frac{1}{2}$	2	3 and Greater
20-30	(1)	(1)	(1)	310	300	285
31-40	(1)	(1)	(1)	305	295	280
41-50	(1)	(1)	310	300	285	275
51-60	(1)	310	300	295	280	270
61-70	310	300	290	285	275	265
71-80	300	290	285	280	270	265
81-90	290	280	275	270	265	260
91 and over	280	275	270	265	260	255

Note 1—No paving permitted.

# COLD WEATHER CONCRETE RESTRICTIONS

DURING THE COLD WEATHER MONTHS FRANKLIN TOWNSHIP ENGINEERING WILL ENFORCE THE FOLLOWING REGULATIONS TAKEN FROM ACI, PCA, AND N.J. STATE STANDARDS:

- 1.) No concrete shall be placed unless the ambient temperature is 40 degrees F, on a rising thermometer or if the interior of the forms and any surface adjacent to the new concrete are preheated to that temperature or higher.
- 2.) Heating of forms shall be by forced air or radiation, no open flame heating will be allowed.
- 3.) The minimum temperature of fresh concrete as placed and maintained shall be 55°F.
- 4.) The duration of recommended concrete temperature shall be six (6) days for conventional concrete and three (3) days for high-early-strength concrete.
- 5.) Calcium Chloride is not allowed as a concrete accelerator. Accel-Guard 80 is acceptable.
- 6.) Adequate acceptable insulating materials shall be provided to maintain the recommended temperature. Blankets, or dry salt hay covered with tarpaulins or polyethylene film are acceptable.

475 DeMott Lane, Somerset, NJ 08873  
Phone: 732-873-2500 ext. 6230 Fax: 732-873-5391

## FRANKLIN TOWNSHIP ENGINEERING DEPARTMENT COMMERCIAL AS-BUILT (RECORD) PLAN REQUIREMENTS

1. As-Built plan to be based upon approved site plan. Two original signed and sealed paper copies shall be submitted.
2. Show both proposed locations and elevations (cross out) and actual locations and elevations.
3. Top and bottom of curb grades.
4. Top and bottom of wall grades
5. Storm sewer grate, rim and invert elevations. Show as-built pipe size, material, length and slope in both plan view and profile (if included in original site plan).
6. Sanitary sewer rim and invert elevations. Show as-built pipe size, material, length and slope in both plan view and profile (if included in original site plan).
7. Show centerline of pavement grades along roadway at 50' stations, centerline intersections and at all high and low points.
8. Show spot elevations to demonstrate drainage in parking areas.
9. Show spot elevations to delineate drainage swales.
10. Provide sufficient grade information to determine detention basin capacity and provide information on outlet control structure.
11. Show location of hydrants, fire department connections and water valves in plan view (station & offsets ties not necessary).
12. Show sanitary sewer clean-outs in plan view (station & offsets ties not necessary).
13. Building footprint locations with offsets to nearest property lines. As-built elevations at building corners.
14. Show parking lot striping and specify handicap spaces.
15. Locate and identify all new signage.
16. Location of all improvements proposed on site plan (sidewalk, curb, edge of pavement, walls fences, guide rails, watercourses, dumpster areas, light poles, trees, etc.).
17. CAD-generated data files, prepared by a New Jersey licensed land surveyor, directly translatable into an identical image of the as-built plan (Requirements per Section 112-329). Electronic files (dwg or dxf) may be sent to the following e-mail address: [engineering.requests@twp.franklin.nj.us](mailto:engineering.requests@twp.franklin.nj.us)

## FRANKLIN TOWNSHIP ENGINEERING DEPARTMENT RESIDENTIAL – SINGLE LOT AS-BUILT (RECORD) PLAN REQUIREMENTS

1. As-Built plan to be based upon approved plot plan. Two original signed and sealed paper copies shall be submitted.
2. Show proposed elevations (cross out) and actual elevations.
3. Storm sewer grate, rim and invert elevations. Show as-built pipe size, material, length and slope in plan view.
4. Show as-built contour elevations to demonstrate surface drainage.
5. Show spot elevations to delineate swales.
6. Show sanitary sewer clean-outs in plan view.
7. Building footprint location with offsets to nearest property lines. As-built elevations at building corners and 10' away from corners.
8. First floor, garage floor and basement floor elevations.
9. Show a cross section of the roadway where the driveway intersects the edge of pavement showing any gutters or cross pipes constructed to maintain the pre-existing drainage flow.
10. Location and dimensions of all improvements proposed on plot plan (building additions, pools, sheds, drives, walks, curb, trees, etc).
11. CAD-generated data files, prepared by a New Jersey licensed land surveyor, directly translatable into an identical image of the as-built plan (Requirements per Section 112-329). Electronic files (dwg or dxf) may be sent to the following e-mail address: [engineering.requests@twp.franklin.nj.us](mailto:engineering.requests@twp.franklin.nj.us)

NOTE: As-built information necessary only in areas disturbed by construction and only on newly constructed improvements. As-built plan to be submitted prior to Certificate of Occupancy inspection.

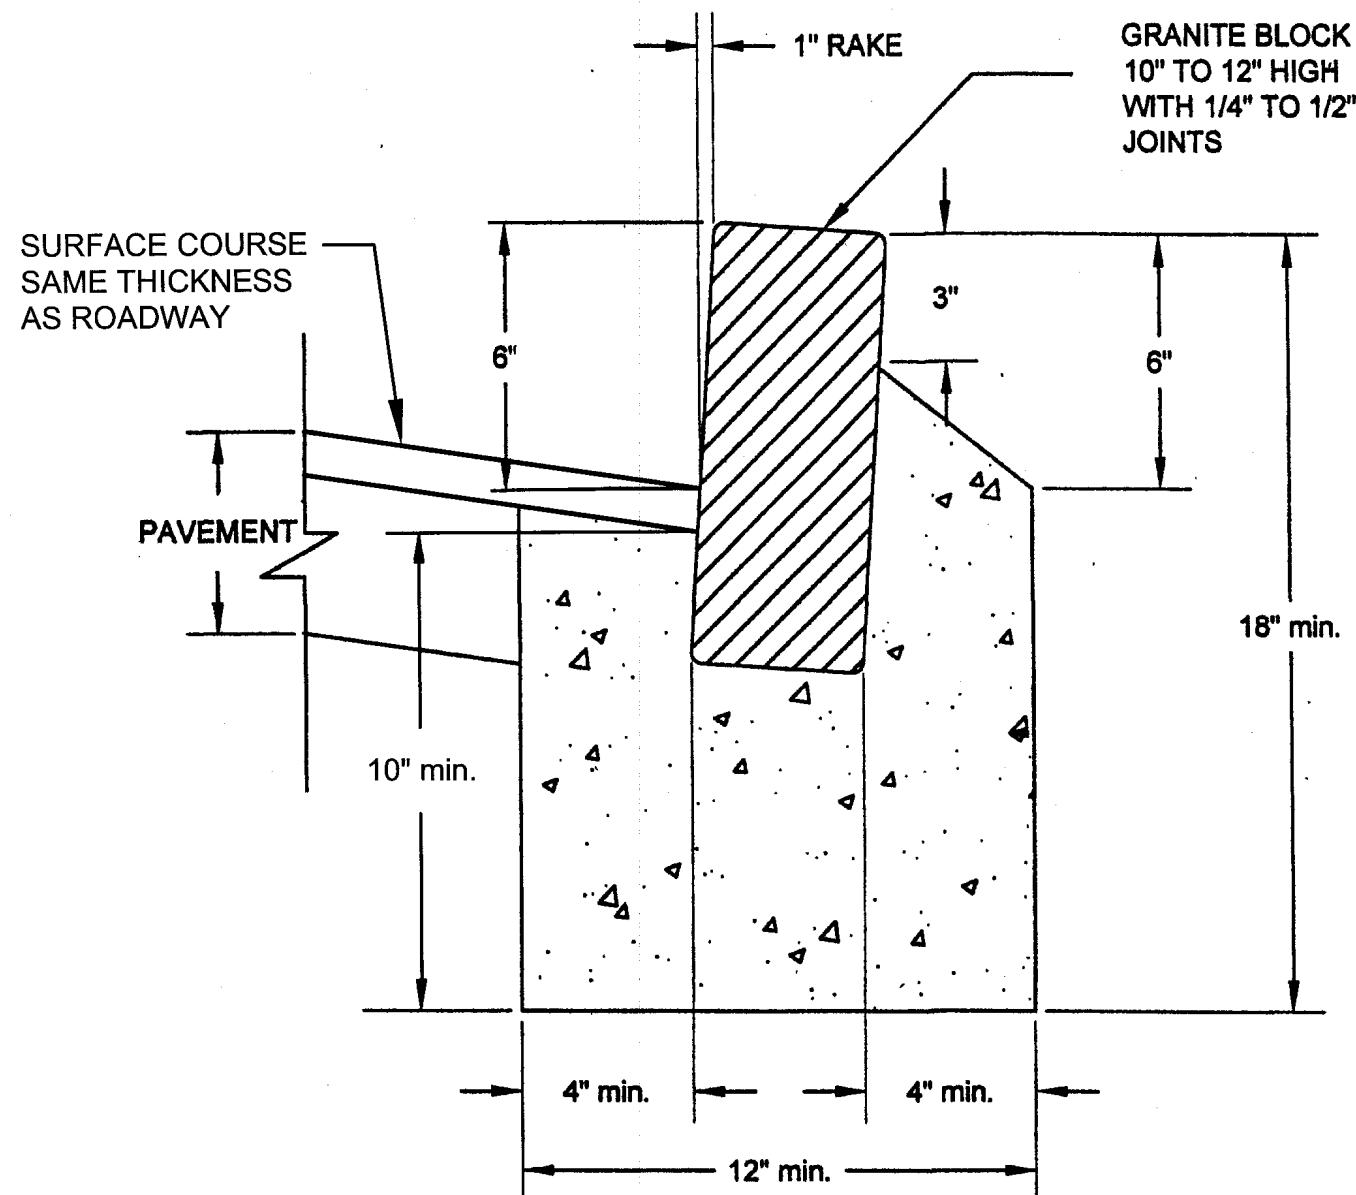

N.T.S.

NOTES: 1. CONCRETE TO BE NJDOT CLASS "B" (AIR ENTRAINED).

2. TRANSVERSE JOINTS 1/2" WIDE SHALL BE INSTALLED IN THE CURB 20' - 0" APART AND SHALL BE FILLED WITH PREFORMED, BITUMINOUS-IMPREGNATED FIBER JOINT FILLER, COMPLYING WITH THE REQUIREMENTS OF AASHTO M-213, RECESSED 1/4" FROM THE FRONT FACE AND TOP OF THE CURB.

3. DUMMY JOINTS (FORMED) SHALL BE INSTALLED MIDWAY BETWEEN EXPANSION JOINTS.

## CONCRETE VERTICAL CURB

SEE ATTACHED GENERAL NOTES

PRECAST MANHOLE  
RISER JOINT DETAIL

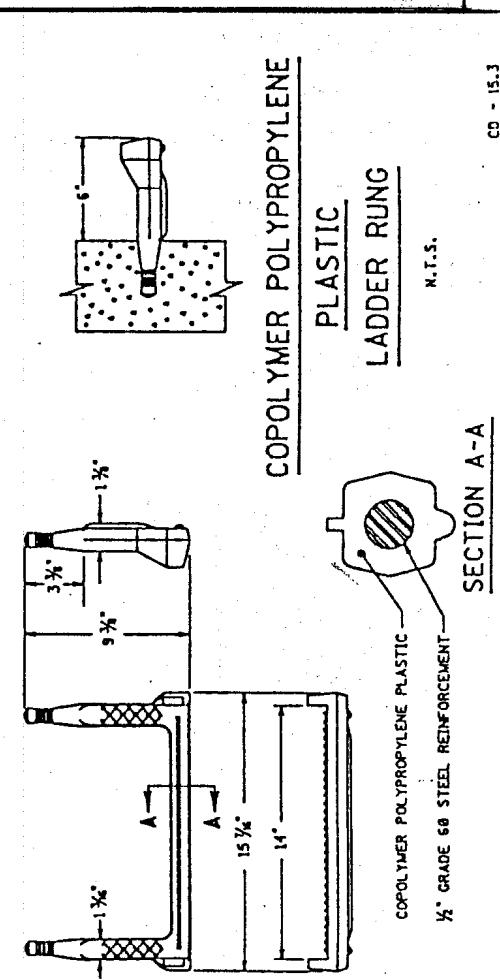

## GENERAL NOTES

1. MANHOLES MAY BE CONSTRUCTED OF BRICK, CONCRETE, CONCRETE BLOCK OR PRECAST CONCRETE.
2. WHEN THE DEPTH OF A MANHOLE EXCEEDS 18 FT. AS MEASURED FROM TOP OF COVER TO INVERT, WALLS OF BRICK, CONCRETE OR CONCRETE BLOCK BELOW A DEPTH OF 6 FT. SHALL BE 12" THICK. THE OVERALL HORIZONTAL DIMENSIONS SHALL BE INCREASED 12", AND THE DEPTH OF THE FOUNDATION INCREASED TO 12". WHEN ROCK IS ENCOUNTERED THE HORIZONTAL DIMENSION AND DEPTH OF THE FOUNDATION SHALL NOT BE INCREASED. THE THICKNESS OF PRECAST CONCRETE MANHOLE WALLS DOES NOT HAVE TO BE INCREASED IF THE DEPTH OF THE MANHOLE EXCEEDS 18 FEET.
3. CASTINGS OF PRECAST MANHOLES SHALL BE ADJUSTED TO GRADE WITH COURSES OF BRICK OR CONCRETE BLOCK, AS REQUIRED.
4. AS AN ALTERNATE TO THE STANDARD MANHOLE FRAME AND COVER A 39" DIAMETER FRAME 5' IN BRICK, CONCRETE OR CONCRETE BLOCK MANHOLES, INVERTS SHALL BE CONSTRUCTED IN TWO STAGES.
5. AS AN ALTERNATE, COPOLYMER POLYPROPYLENE PLASTIC LADDER RUNGS MAY BE FURNISHED IN PRECAST MANHOLES AND INLETS.

# MANHOLE CASTING, NOTES & LADDER RUNGS

GENERAL NOTES:

- INLETS MAY BE CONSTRUCTED OF BRICK, CONCRETE, CONCRETE BLOCK OR PRECAST CONCRETE. WALLS SHALL BE 8" THICK IF BRICK AND 6" THICK IF CONCRETE. CONCRETE BLOCK OR PRECAST CONCRETE FOUNDATIONS AND INVERTS SHALL BE CLASS C CONCRETE.
- CORBELLING OF INLET WALLS WILL BE PERMITTED AT THE RATE OF  $\frac{1}{2}$  FT. FOR 8' OF HEIGHT; MAXIMUM CORBEL 6" PER WALL.

- EXCEPT FOR INLETS TYPE A AND C FOUNDATIONS AND INVERTS SHALL BE CONSTRUCTED IN TWO STAGES. AND THE BOTTOM OF THE FOOTINGS SHALL BE 8" BELOW THE OUTTER WALL OF THE LOWEST PIPE IN THE INLET.
- WHEN THE DEPTH OF AN INLET THAT IS NOT PRECAST EXCEEDS 10', AS MEASURED FROM TOP OF GRATE TO INVERT, WALLS BELOW A DEPTH OF 8' SHALL BE 12" THICK AND THE DEPTH OF FOUNDATION INCREASED TO 12'. WHEN ROCK IS ENCOUNTERED THE DEPTH OF THE FOUNDATION SHALL NOT BE INCREASED.
- INLET FOUNDATIONS WHICH ARE PRECAST SHALL BE PLACED ON A 6" THICK BED OF COMPACTED COARSE AGGREGATE SIZE NO. 57. THE COARSE AGGREGATE SHALL EXTEND 6" BEYOND THE HORIZONTAL LIMITS OF THE INLET FOUNDATION.
- CASINGS FOR PRECAST INLETS SHALL BE ADJUSTED TO GRATE WITH COURSES OF BRICK, AS REQUIRED, 12" MAXIMUM.
- WHEN THE DEPTH OF A PRECAST INLET EXCEEDS 10' AS MEASURED FROM TOP OF GRATE TO INVERT, THE FOUNDATION SHALL BE INCREASED TO 12'. WHEN ROCK IS ENCOUNTERED THE DEPTH OF THE FOUNDATION SHALL NOT BE INCREASED.
- MINIMUM WALL REINFORCEMENT FOR PRECAST INLETS TYPE A, B, C, E, D-1, AND B MODIFIED.

DEPTH BELOW TOP OF GRATE	HORIZONTAL REINF.	VERTICAL REINF.	WALL THK.

## GENERAL NOTES

1. THE RUBBING OF HEADWALLS TO REMOVE FORM MARKS AS REQUIRED IN SUBSECTION 501.14 FOR CONCRETE STRUCTURE WILL NOT BE REQUIRED FOR HEADWALLS AT THE BOTTOM OF EMBANKMENT IN RURAL AREAS.
2. ALL EDGES TO BE CHAMFERED 1".
3. FOR ARCH PIPE USE LENGTH OF HEADWALL AS 3H + SPAN.
4. FOR MORE THAN ONE PIPE, SET THE PIPE A MINIMUM OF ONE FOOT APART (OUTSIDE BARREL TO OUTSIDE BARREL); THE ENDS OF THE HEADWALL SHALL BE SET 2D OFF THE C. OF THE CONTROLLING PIPE.

**CONNECTOR-RETAINER BOLT**

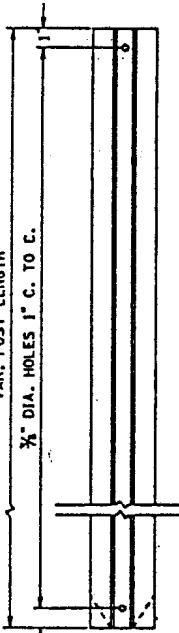

**TWO PIECE STEEL U-POSTS**

**GENERAL NOTES:**

1. DRIVE THE ANCHOR POST INTO THE GROUND (UTILIZING A DRIVE CAP) UNTIL 18-12" OF ANCHOR POST IS REMAINING ABOVE GROUND LEVEL.
2. ALIGN THE CONN. HOLE CLOSEST TO THE LONG SLOT IN THE RETAINER SPACER STRAP WITH THE TOP HOLE IN THE ANCHOR POST. THE STRAP IS THEN ATTACHED BY MAKING A BOLTED CONNECTION THROUGH THE BOTTOM HOLE IN THE STRAP AND THE HOLE IT ALIGNS WITH IN THE ANCHOR POST.
3. ROTATE THE STRAP 90 DEGREES TO THE LEFT AND DRIVE THE ANCHOR POST INTO THE GROUND UNTIL ONLY 4" REMAIN ABOVE GROUND LEVEL. THIS 4" MUST BE ADHERED TO FOR SAFETY REASONS TO ENHANCE THE BREAKAWAY FEATURES OF THE SIGN IN ACCORDANCE WITH CURRENT FEDERAL AND STATE SAFETY STANDARDS. EXCAVATE AS REQUIRED TO TIGHTEN BOLTS.
4. ROTATE THE STRAP BACK TO VERTICAL POSITION.
5. PLACE THE SIGN POST AGAINST THE ANCHOR POST AND THE STRAP. ALIGN THE BOTTOM HOLE IN THE SIGN POST WITH THE CONN. HOLE IN THE LOWER END OF THE STRAP. INSERT TWO (2) CONNECTOR BOLTS THROUGH THE COMMON HOLES IN THE SIGN POST, STRAP AND ANCHOR POST.
6. COMPLETE THE CONSTRUCTION BY ATTACHING THE STRAP TO THE SIGN POST WITH A BOLT AND NUT. THIS CONNECTION SHALL BE MADE AT THE BOTTOM OF THE LONG SLOT IN THE STRAP.
7. TWO PIECE STEEL U-POST IS A PATENTED DEVICE. THE PATENT NO. IS 4126403.

# SIGN POSTS

**GENERAL NOTES :**

1. ALL POSTS SHALL BE OF ADEQUATE LENGTH TO MEET THE REQUIREMENTS FOR ERECTION AS STATED IN THE CURRENT "MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES FOR STREET AND HIGHWAYS".
2. TWO PIECE STEEL POST SHALL BE EMBEDDED 3'-8" MIN. ONE PIECE STEEL POST SHALL BE EMBEDDED 3'-6" MAX.
3. ALL STEEL POSTS AND BRACKETS SHALL BE CUT, BENT AND HOLES PUNCHED AND DRILLED BEFORE GALVANIZING. GALVANIZING SHALL BE IN CONFORMITY WITH CURRENT A.S.T.M. SPECIFICATIONS A 123.
4. POSTS MAY BE STEEL OR 2 PIECE STEEL U-POST IN CONFORMANCE WITH THE NOTES BELOW.
5. SIGN PANEL SIZES SHALL DETERMINE POST TYPE AND NUMBER AS SHOWN ON THIS DETAIL.
6. BOLTS SHALL NOT PROTRUDE MORE THAN 3/8" BEYOND THE NUT WHEN TIGHT BUT SHALL ENGAGE ALL THREADS IN THE NUT.
7. THE MINIMUM VERTICAL CLEARANCE REQUIREMENTS FOR SIGNS ARE:

EDGE OF PAVEMENT TO BOTTOM OF SIGN AS PER SECTION 2A-23 OF THE "MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES FOR STREETS AND HIGHWAYS".

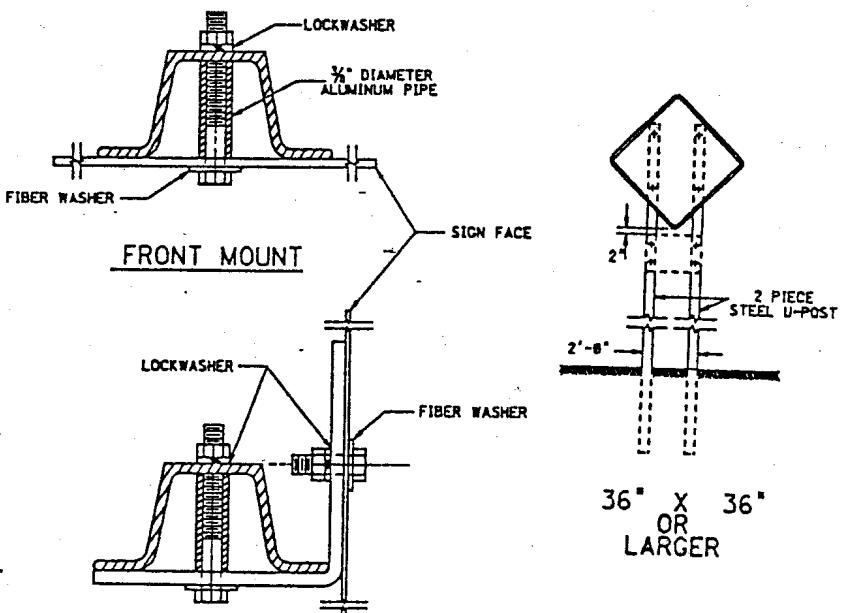

GROUNDLINE TO BOTTOM OF SIGN SHALL BE 7 FEET MINIMUM.

FOR SINGLE POST INSTALLATIONS, THE MINIMUM DISTANCE FROM GROUNDLINE TO THE TOP OF SIGN MUST BE 9 FEET.

THE FINAL HEIGHT OF ALL SIGNS MUST MEET OR EXCEED ALL OF THE ABOVE REQUIREMENTS.

8. PERMANENT SIGN SUPPORTS SHALL NOT BE INSTALLED ON SLOPES GREATER THAN 10:1, UNLESS BEHIND A TRAFFIC BARRIER, AND THE SLOPE SHALL EXTEND A MINIMUM OF 3'-8" BEYOND THE OUTSIDE EDGE OF SIGN (SEE GRADING DETAIL FOR SLOPE TREATMENT).
9. EXTRUDED ALUMINUM SIGN PANELS ARE NOT PERMITTED FOR USE WITH U-POST SIGN SUPPORTS.
10. U-POST SIGN SUPPORTS SHALL NOT BE PLACED IN FRONT OF GUIDE RAIL AND THE POSTS MUST NOT STRADLE GUIDE RAIL.

**U-POST**

N.T.S.

FIRE HYDRANT MARKERS

Each fire hydrant shall be marked with a standard U-channel post, 1 1/2" wide. The post shall be six (6) feet tall and bedriven into the ground 18-24 inches. The post shall have two (2) blue colored reflectors, three (3) inches in diameter. One reflector on each side of the post, facing traffic. The post shall be installed 24-30 inches before the fire hydrant, and slightly behind the hydrant.

Fire hydrants must be flow tested by the Fire Prevention Department. Written request and appropriate fees must be submitted.

Fire hydrants must comply with detail, all threads must be lubricated, and all valves must be fully open prior to testing.

#### SECTION A-A

#### HORIZONTAL AND VERTICAL UPWARD BENDS

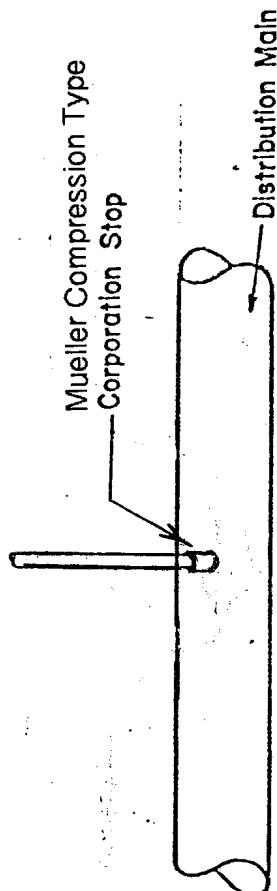

#### PLAN

# HOUSE SERVICE CONNECTION

TOP VIEW

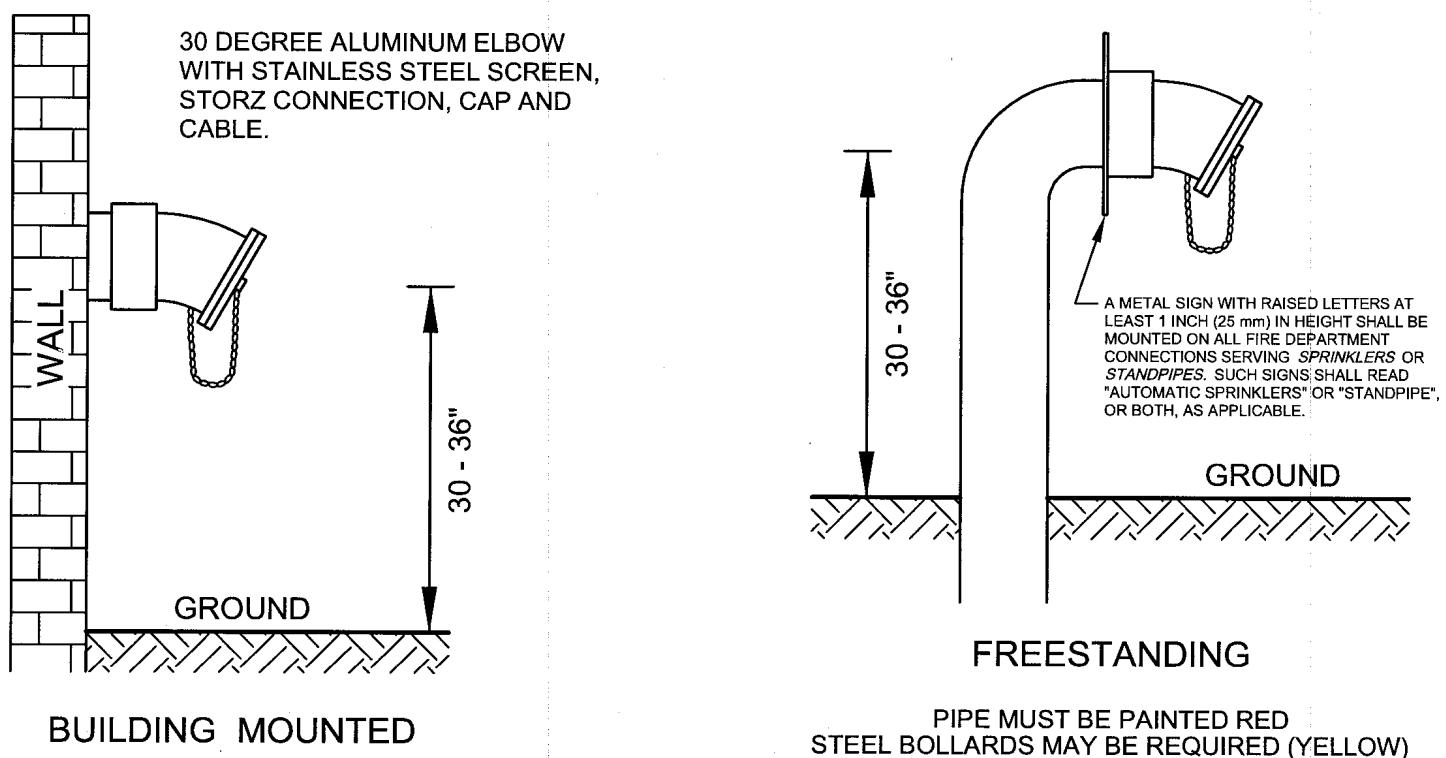

## 5" STORZ HOSE CONNECTION

FIRE DEPARTMENT CONNECTIONS SHALL BE LOCATED ON THE STREET ADDRESS SIDE OF THE BUILDING IN A VISIBLE, EASILY ACCESSIBLE LOCATION APPROVED BY THE TOWNSHIP FIRE OFFICIAL. THIS LOCATION MUST BE WITHIN 50 FEET OF A FIRE HYDRANT AND LOCATED ON THE SAME SIDE OF THE STREET.

## SIGNS

FIRE DEPARTMENT CONNECTIONS SHALL HAVE A SIGN INSTALLED ABOVE THEM. THIS SIGN SHALL BE VISIBLE FROM THE DRIVEWAY OR ROADWAY WHERE THE FIRE DEPARTMENT WOULD ACCESS THE FDC.

THE SIGN SHALL BE RECTANGULAR SHAPED WITH RED LETTERS AND RED BORDER ON A WHITE BACKGROUND AND SHALL BE A MINIMUM OF TWELVE (12) INCHES BY EIGHTEEN (18) INCHES WITH THE LONGER DIMENSION HORIZONTAL. SIGNS SHALL BE MADE OF METAL OR OTHER COMPARABLE DURABLE MATERIAL AND ALL CORNERS SHALL BE ROUNDED. SIGNS SHALL BE REFLECTORIZED. THE MESSAGE ON THE SIGNS SHALL READ "FDC" AND THE LETTERS SHALL BE EIGHT (8) INCHES HIGH AND ONE AND ONE (1 1/4) INCH WIDE.

# ***FIRE DEPARTMENT CONNECTIONS***

*N.T.S.*

***Franklin Township***  
***Somerset County, NJ***

# FIRE LANES

(For additional information see Code of Franklin Township, Chapter 132, Article V)

## FIRE LANE MARKINGS

Fire Lanes shall be identified by a four (4) inch wide yellow line painted on the pavement, parallel to curbs or the pavement edges, and between three (3) and four (4) feet from the curb or pavement edges.

The words "NO PARKING FIRE LANE" maybe required where the Fire Official determines that additional marking is needed to clearly identify any fire lane. The words shall be between the yellow line and the curb or pavement edge. These words shall be yellow block letters not less than twelve (12) inches high with four (4) inch wide strokes.

Fire lane pavement markings shall be painted as frequently as needed to maintain clear identification.

## FIRE LANE SIGNS

Signs shall be rectangular shape with red letters and border on a white background, and shall be a minimum of twelve (12) inches by eighteen (18) inches with the longer dimension vertical. Signs shall be made of metal or comparable durable material, and all corners shall be rounded. Signs shall be reflectorized. The message on signs shall read "NO PARKING FIRE LANE".

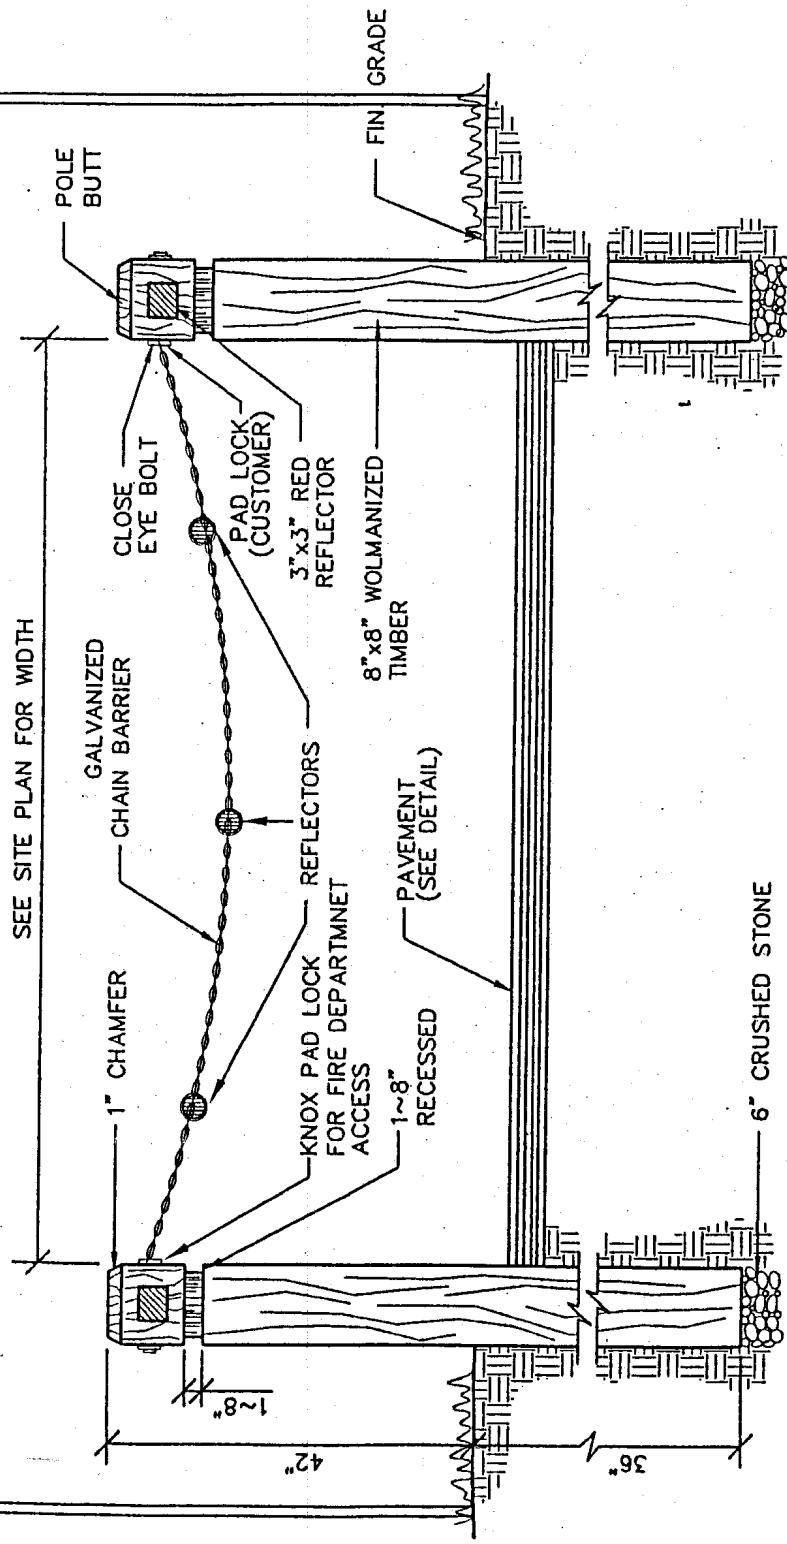

There shall be a sufficient number of signs for each fire lane to face all directions of traffic flow into and within said areas, and so as not to exceed a maximum distance of one-hundred (100) feet between signs facing the same direction of traffic flow. Signs shall be mounted at right angles to the direction of and facing the traffic flow. Signs shall be installed so that the bottom of each sign is five (5) feet above the pavement. The bottom of the sign may be seven (7) feet above the pavement where subject to pedestrian traffic at that location.

Signs shall be kept in good condition and clearly legible at all times. Damaged, destroyed or missing signs shall be promptly replaced.

NO PARKING FIRE LANE  
SIGN DETAIL

N.T.S.

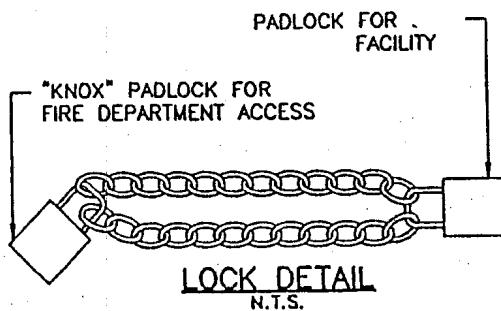

## FIRE LANE BOLLARDS + CHAIN

Steel bollards maybe substituted for wolmanized timber. Bollards must be painted safety yellow.

# FIRE DEPARTMENT ACCESS GATES

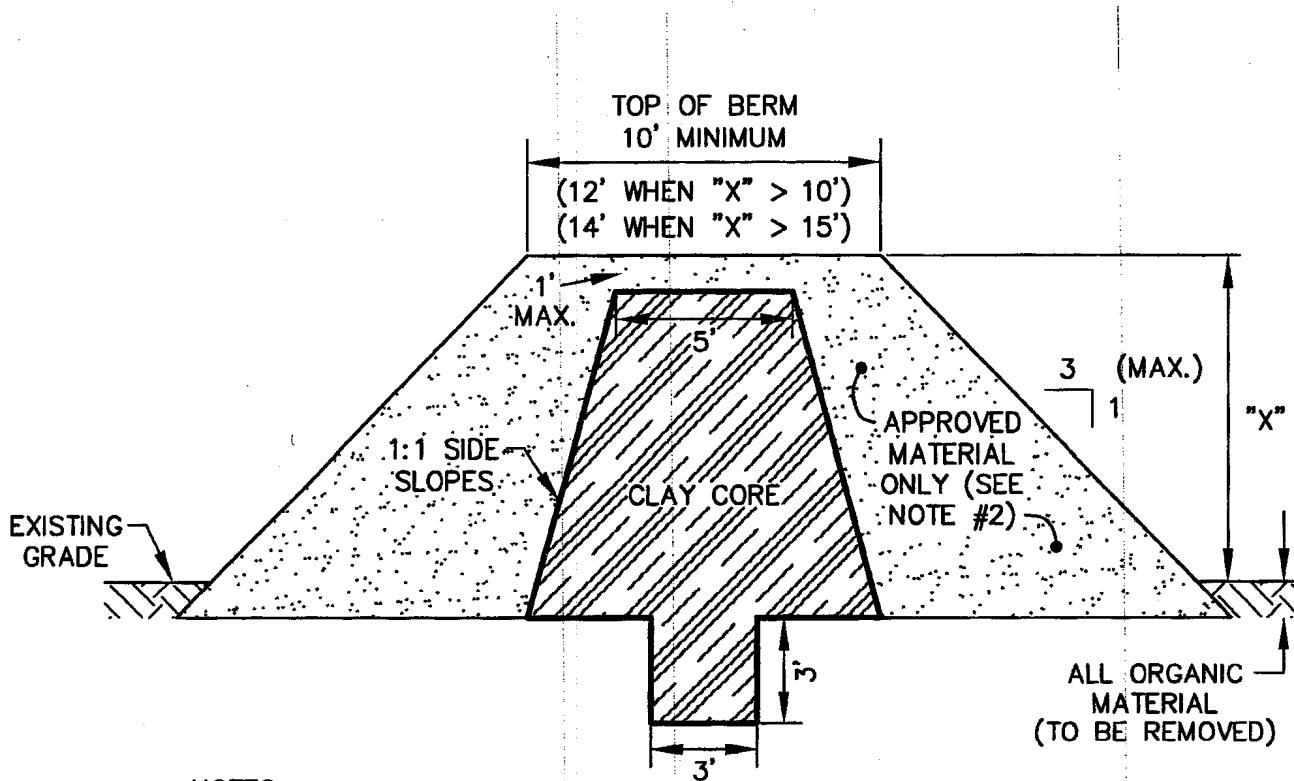

Manual gates for fire department access must be equipped with KNOX padlock and comply with detail.

Electric powered gates for fire department access must be equipped with siren activated opening device. The device shall be manufactured by S.O.S. or equivalent.

NOTES:

1. The Clay Core shall consist of compacted clay material (unified soil classification "CL"). The material shall be certified by a licensed New Jersey professional Engineer. The material shall be approved by the Township prior to installation. A Soil Importation Permit will be required, if the material is not from a certified source.
2. The fill material in all earth dams and embankments shall be compacted to at least 95% of the maximum density obtained from compaction tests performed by the appropriate method in ASTM D698.
3. Trees and other vegetation with large extensive root structure shall not be permitted on any dam or embankment.
4. The basin is to be topsoiled with a minimum of 4" of topsoil and seeded, including the bottom, side slopes and all earthen dams and embankments. "Topsoil" is defined as the natural, undisturbed surface layer of soil having more organic matter than subsequent layers suitable for satisfactory growth and maintenance of permanent, locally adapted vegetation. The material must be friable, loamy soil reasonably free of debris, objectionable weeds, lumps, roots, stones, or similar objects larger than 1-inch in any dimension; have a natural pH of 5.0 to 7.5; have an organic matter content greater than 2.00 percent; and contain no toxic substances which may be harmful to plant growth the seeding shall, as a minimum, conform to type "A" grass seed mixture as defined in the NJDOT standard specifications for road and bridge construction.
5. Slope to be maximum of 3:1 or as directed by the Township Engineer.

**EMBANKMENT AND DETENTION BASIN CLAY CORE  
N.T.S.**

(TO BE USED ON ALL EMBANKMENT AREAS WITH FILL GREATER THAN TWO FEET)

**Franklin Township  
Somerset County, NJ**
