

## **ENVIRONMENTAL COMMISSION TABATCHNICK ZBA-15-00018**

This is a resubmittal. Work was never done when approved previously.

Environmental Commission recommends using pervious paving for car parking areas.

We believe that this project presents a great opportunity to use a "Green Roof" to help alleviate Stormwater runoff. A crop of herbs and spices could be grown on the roof.

Applicant should also consider Solar cells as a possibility. Either on the roof or as a canopy over the passenger car parking areas.

Applicant should also consider installing electrical car charging stations

We note the removal and replanting of trees. While noting the calculations for replacement will there also be a contribution to the tree fund.

Paul Walitsky  
Vice Chair  
Franklin Township Environmental Commission
