

Environmental Commission Comments

Brentwood Bay ZBA 19-00006

The Environmental Commission recommends that the Applicant consider Applying on behalf of the planned tenants for Community Solar granted electric power.

Several Companies have evidently applied to supply Solar generated power to residents in this area of the Township. We believe that this project could be a potential recipient of such electric bill relief. Such a project if approved would be a further enticement for potential residents.(and help reduce their electric bills)
